

Week 1

This time is meant to feel super relational and designed to focus on welcoming new group dynamics. Spend time laughing together and go where the conversation leads. Use questions as needed to reengage or dig in a little deeper.

Where's the most unusual place you have ever visited?

Can you think of a time when you weren't excited to go somewhere and then had a better experience than you expected? What was that like?

Have you ever been to a circus? What was your favorite part?

When you go to a carnival/fair what is your favorite thing to do? (Food, games, rides, explore, people watch)

How do you respond when you feel like you don't belong somewhere?

How can we as a group create a place where everyone belongs every week?

What is something we want to set as a goal for our group over the next few months? (Great chance to lead students towards something, work towards an incentive if it makes sense)
